

KESHAV KUMAR JHA

Python Backend Developer | Django Developer | API & AI Integration

Uttam Nagar, New Delhi | +91 9667131795 | kjkeshav0698@gmail.com

LinkedIn: [linkedin.com/in/keshav-jha-801348384](https://www.linkedin.com/in/keshav-jha-801348384) | GitHub: github.com/keshav-codex

Self-driven Python Developer focused on backend engineering and scalable software development. Strong foundation in Core Python, Object-Oriented Programming, JSON, SQL, Data Structures & Algorithms, PostgreSQL, and Django. Currently building **LifeChronicle**, a specification-driven software engineering project designed to gain practical experience across the complete software development lifecycle—from system design and backend architecture to REST APIs, AI/LLM integration, data processing with Python libraries, DevOps practices, cloud deployment, and production-ready application development. Passionate about writing maintainable code, continuous learning, and solving real-world engineering problems.

Experience: Fresher

Skills

- Python • Django • CRUD Development • MVT architecture • JSON • PostgreSQL • Git • GitHub • Linux
- Netlify • Render • HTML • CSS • JavaScript • Prompt Engineering • ChatGPT • Gemini AI
- (Learning)->** • Django core architectural and programmatic techniques • Role-Based Access Control (RBAC)
- Django REST API Framework • API Integration • LLM Integration • OAuth • Google Maps API Integration
- Email Integration (SMTP) • Social Login Integration • Scalable System Design • Scalable Database Design
- Specification-Driven Development • NumPy • Pandas • Matplotlib • Web scraping • Docker

Featured Software Projects & repositories (GitHub)

- 1. Registration & Login System** ([GitHub](#) | [Live Demo](#))
Tech Stack: HTML5 | CSS3 | Bootstrap | JavaScript | JSON
 - Developed a responsive student authentication portal with registration, login, dashboard, client-side validation, and auto-generated registration numbers.
 - Implemented Local Storage and JSON-based data handling with profile photo upload, password management, and responsive UI.
- 2. Staff Management System** ([GitHub](#) | [Live Demo](#))
Tech Stack: Python | Django | PostgreSQL | Django ORM | HTML5 | CSS3 | Bootstrap
 - Built a Django MVT-based CRUD application for managing staff records using PostgreSQL and Django ORM.
 - Implemented database models, migrations, template inheritance, URL routing, and a responsive Bootstrap interface.
- 3. Exam Center Management System** ([GitHub](#) | [Live Demo](#))
Tech Stack: Python | Django | PostgreSQL | Django Forms | HTML5 | CSS3 | Bootstrap
 - Developed a Django CRUD application for managing exam center information with ModelForm validation and PostgreSQL integration.
 - Implemented Django Forms, template inheritance, URL routing, ORM-based database operations, and a responsive Bootstrap UI.
- 4. LifeChronicle** (In Progress) ([GitHub](#))
Tech Stack: Python | Django | PostgreSQL | REST APIs | AI/LLM | System Design
 - Designing an enterprise-scale digital life management platform using a specification-driven software development approach with detailed SRS, architecture, and database design.
 - Building a modular Django backend featuring authentication, event management, media management, location services, reporting, and scalable application architecture.
 - Planning integration of REST APIs, AI/LLM capabilities, multilingual support, analytics, and comprehensive project documentation following software engineering best practices.

Education

• MCA – IGNOU (2021) • BCA – IGNOU (2019) • Class XII (2016) • Class X (2014)

Core Strengths

- Quick Learner • Problem Solving • Self-Driven • Team Collaboration • Clean Code • Adaptability • Innovative
- Self-Motivated • Communication • Time Management • Ownership • Attention to Detail • Critical Thinking
